

## Analyzing the crisis

The economy is one of the main problems of today. Spain is one of the countries suffering a big crisis. We like our students get knowledge about how economics have been developed through the times

We propose students the following works:

1. Make a presentation in English on how economy were developed in Spain from Midle Ages till now.
2. Make a game in English to get a better knowledge about the economy from Middle Ages till today.
3. Make an analisis of the different economic crissis and how they were solved since Middle Ages till now. The students will do the work in both languages ( English and Spaninsh) . We divide the class in five teams, each one is expert in each crisis stage. We make an intereactive TV programme or radio programme. Each team introduces the theme and other students make questions and the expertle team gives the answers.
4. Panel of experts: Organize a radio programme in which a radio conductor interviews four experts.
5. Students evaluate the contents and the quality of the presentation and the programme through videocases.
