Tasks

With the help of a diagram explain to your colleges what happens in earthquakes, volcanoes...

Show the students different image, they have to speak about them.

Teaching Pointers

- To introduce the topic, write provide the new vocabulary and structures to students.
- Using a drawing/diagram make the students say what happens. The teacher says the sentences correctly
- Check their comprehension by retail expressions (looking at the pictures)
- Describe images
- Students write their own description.
