What is this material used for

The activity tries to implement language competences, the creativity and the ICT competences and the competence to learn to learn and also personal initiatives and selflearning.

Metodology:

The methodology is “learning by doing” The teacher proposes the tasks but also explains how to do it step by step. The activity is centred in the student

Evaluation

Students must be able to change information in knowledge by writing a biography with their own words and writing down own ideas.

Students should produce questions for the selected personality and answers from his/her point of view

Students can work with different languages.

The teacher will evaluate how the information has been treated

Organization of the team work will be evaluated

How students make self-evaluation on acquired competences
