

Animals that live in the water

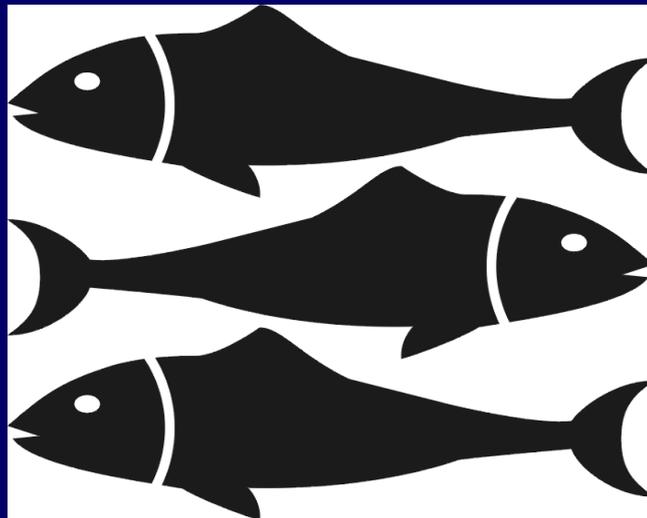

We Start the theme making a brainstorming with students about animals that live in the water.

We introduce the vocabulary with the white board

After that, we make students read the text (pag 4 Water). We check the comprensión and if the previous information they had about the theme was correct.

We go on making activities with the whiteboard

The next day the students prepare a poster / Power Point presentation about the animals that live in the water.

Most of animals that live in the water are fish
